

PROJECT EXPERIENCE

GRAND TRAVERSE RESORT

ACME, MICHIGAN

From 1980 to 1988, R. Clark Associates, Inc. (RCAI) staff provided master planning, site planning, landscape design, and entitlement services for the Grand Traverse Resort, which transformed the property from farm fields to a destination resort. In addition to master planning and site design services, RCAI prepared submittals for municipal review of and obtained approval for all resort projects. A member of the development team, RCAI coordinated with architects and engineers on all site work. RCAI developed the landscape design for the resort and worked with the construction management services division to ensure installation brought the design into fruition. This included sole responsibility for the tree transplanting program which involved locating, negotiating value and coordinating the installation of over 1,000 trees per year. Through creative design, attention to detail, and coordination with other professionals, RCAI helped transform the Grand Traverse Resort into the distinctive destination resort it is today.
